DIGITAL ACADEMY

WINNIE
NHLAPO

During the 6 month period of the IT: Systems Support learnership programme at The Digital Academy **Winnie** and her team created a mobile application called **Two Minds**.

Winnie's main responsibilities on the project were working on the Frontend using HTML, CSS, Angular, and Bootstrap.
I would have no hesitation in recommending **Winnie** as a Junior Software Developer. She is a strong willed individual and never afraid of asking the hard questions. She is always willing to push her team further, and to assist them with any task.
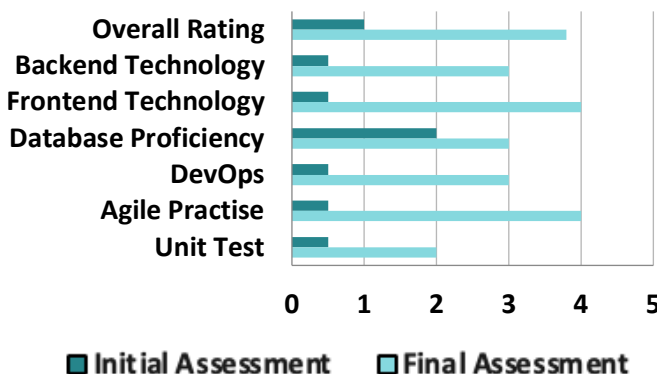

SOFT SKILLS

Winnie's most improved competency:

Team player

The skill to venture on with strong resolve and persistence, committed to getting the job done and works well within a team.

Problem Solving — 3
Interpersonal Skills — 3
Leadership — 2
Team Player — 4
Communication — 4

Problem Statement

Depression is a major problem which affects employee performance in work places and causes companies to lose money due to loss in productivity. How can we raise awareness and assist those who are in need, through technology?
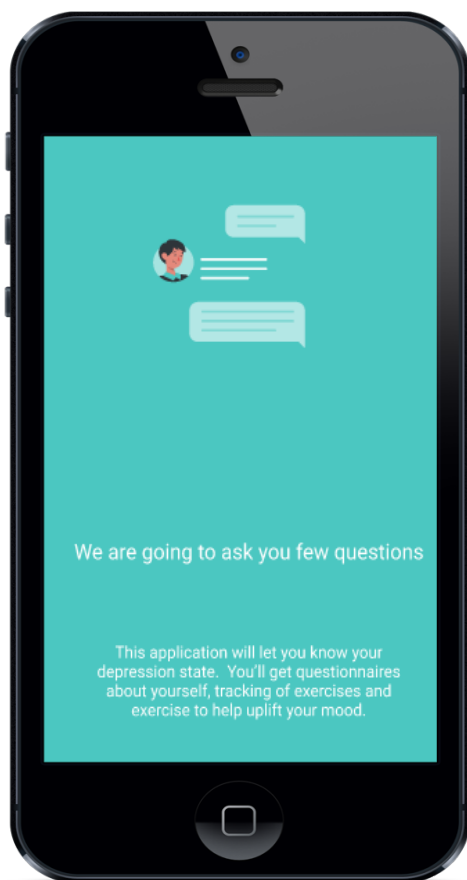

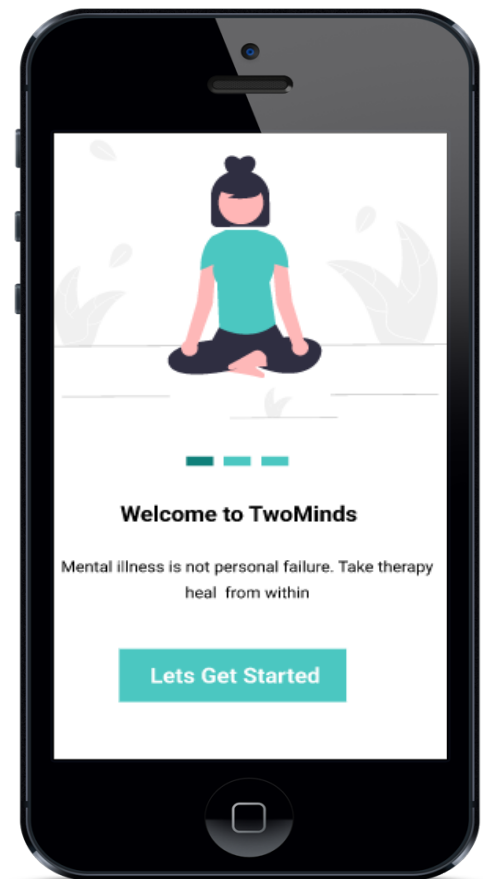

Solution

TwoMinds is an application that educates Users on how to ease their mental well-being. Users fill in a short questionnaire and the application will connect them with experts who are best suited dependant on the results of the questionnaire. The application also provides relaxation audios and a journal function to record daily emotions, feelings, stresses and thoughts.

Sign Up/Sign In

Users are welcomed by our Sign Up/Sign In page. New Users are required to Register in order to make full use of the Application.

Welcome to TwoMinds

Mental illness is not personal failure. Take therapy heal from within

Lets Get Started

We are going to ask you few questions

This application will let you know your depression state. You'll get questionnaires about yourself, tracking of exercises and exercise to help uplift your mood.
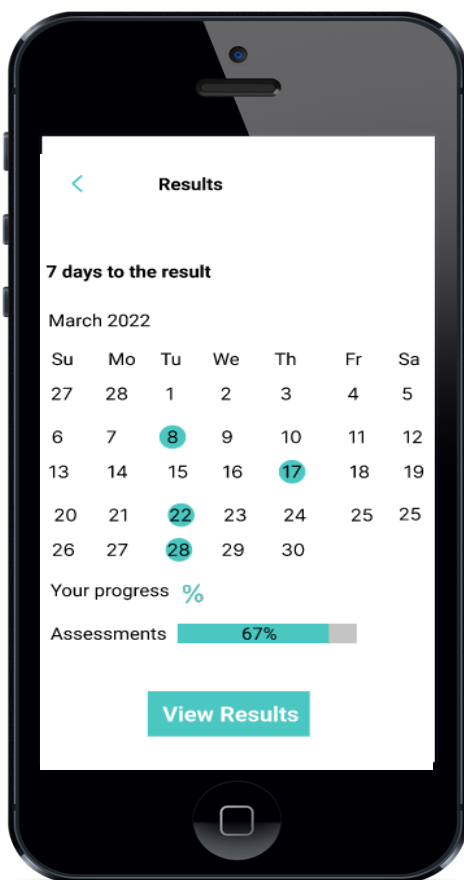

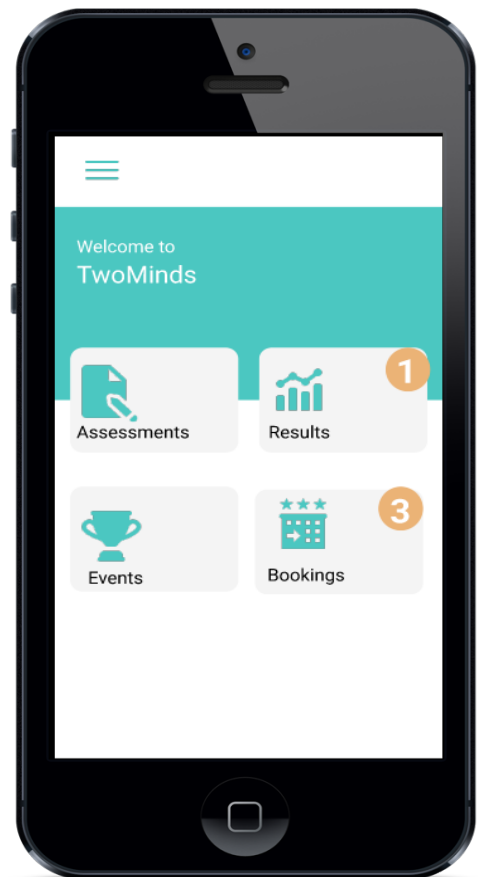

Home Page

Once the User has registered and successfully Logged in, they will be redirected to the questionnaire where they would need to answer a few questions to help better understand their current mindset.

User Dashboard

Each User has a dashboard where they can review the assessments that are available, their results, events taking place and manage bookings.

Results

On the results page a User can see highlighted dates. Past dates will have the assessment results for the assessment taken on that day, and future dates will show the assessment that can be done on that date.

Admin Dashboard

An Admin User has access to all bookings, assessments and results of the registered Users. The Admin can manage and asses the cases that need immediate attention or assistance.
